Hi Ray,

The meeting will be here at DTSC's Cal Center starting at 10am.

8800 Cal Center Drive
Sacramento, CA 95826

Northrop Grumman does not want an agenda rather an opportunity to walk the State through the historical activities (investigation/remediation) taken at the Benchmark Facility. DTSC will have an agenda prepared for the meeting to at least help streamline the presentations but also facilitate discussions. The attendees will be NG, DTSC, and USEPA. DTSC has been doing some research/analyses on the Benchmark data and also hope to share our findings after the NG presentation.

Hi Pete,

Could you forward logistics and agenda for tomorrow's meeting. Thanks

Ray
